

Case study; shower room and WC change – Falmouth

The Challenge:

Both the shower room and the WC were old and out of date, Trident stripped out all existing sanitary ware and tiles off the wall ready to install new flooring, sanitary ware and wall boarding.

Bathroom day one.

WC day one.

The Outcome:

Trident quoted for both rooms to be renovated, including electrical work in the shower room and lights in the WC. All of the work was priced against a plan provided by the customer.

The above photos are from the first day on site.

The above photos are of the finished shower room, a new shower, shower tray and screen installed, along with a new vanity basin, towel rail and toilet. Click flooring has been installed, the walls have been skimmed and wall boarding around the shower tray and behind the sink.

The above photos are from the finished WC. Trident installed a new sink unit, toilet, small towel rail and the cupboard above. The same click flooring and wall boarding has been installed and the remaining walls skimmed to a flat finish.
