

The Stable Bar and Restaurant

The Challenge

The Stable Bar were granted planning permission to convert the old Custom House on Arwenack Street in Falmouth into a trendy new bar and pizza restaurant. The premises needed to be fully renovated internally whilst not affecting the character of the historic building.

The Solution

Trident Plumbing, Heating and Electrical Ltd were commissioned to carry out the plumbing and heating works. This included installing the new bathrooms; ladies and gents toilets; disabled toilet and all the kitchen equipment.

The Outcome

Trident Plumbing, Heating and Electrical Ltd were, after many long days of hard work, able to complete the project in time for the grand opening. We were proud to be involved in this exciting development and with how smoothly the project went.

This is what Luke Sleeman (Director) had to say:

"Converting the old Custom House was an interesting project to be involved with. We were delighted to see The Stable Bar select a local firm; it all helps to create a more sustainable Cornwall"

Stan, the restaurant manager said:

"We couldn't be happier with the work carried out by the Trident team. Their professionalism and efficiency was fantastic; we wouldn't hesitate to recommend them to anyone!"
